Executive Summary

- (i) In accordance with National Planning Policy Framework (NPPF 2018) paragraph 73, the Council has identified five years of deliverable housing land supply against the District’s housing requirements. Deliverable means that sites should be available now; offer a suitable location for development now; and, be achievable with a realistic prospect of the housing being delivered on the site within five years.
- (ii) The Council’s latest housing requirements are set out in the Local Development Plan (approved by the Secretary of State in July 2017) and associated evidence base including an up-to-date assessment of the District’s Objectively Assessed Need (OAN). The OAN identifies the District’s housing requirement for the next 15 years as 280 new homes per annum, which has been uplifted to 310 in the LDP, or 4,650 over the plan period (2014-2029). The base-line housing requirement for housing over the 5 year period of the 5YHLS is the LDP target (310) x 5. To this is added the shortfall in completions since the beginning of the Local Development Plan period. In addition, a 20% NPPF buffer has been applied, in recognition that there has been under delivery of housing in the previous three years. When the Housing Delivery Test is introduced in November 2018, housing delivery below 85% of that required, over the previous three years, will require the application of a 20% buffer in the 5YHLS¹.

The District’s requirement for a five year housing land supply (5YHLS):

	Annual target x 5 (310 x 5=1,550)
+	Shortfall in completions from previous years (532)
+	20% NPPF buffer (416)
=	<u>2,498</u>

- (iii) The District’s housing supply consists of sites with planning permission, Local Development Plan Strategic Allocations and a windfall allowance for years 3-5 of the 5YHLS period. A 4% allowance for slippage and non-implementation is deducted from the total 5 year supply.

The District’s supply:

	LDP Strategic Allocations and other sites with planning permission (2,117)
+	LDP Strategic Allocations without planning permission or a resolution to grant planning permission subject to completion of a S106 agreement (618)
+	Windfall Allowance (150)
-	4% slippage and non-implementation rate (-115)
=	<u>2,770</u>

5YHLS calculation:

Total supply / Rolling five-year housing requirement x 5

$$2,770 / 2,498 \times 5 = \underline{\underline{5.54 \text{ years}}}$$

- (iv) The Council can therefore demonstrate 5.54 years’ worth of housing land supply against its identified housing target.

¹ NPPF para 73 and footnote 39

Introduction

1. This statement sets out Maldon District Council’s housing land supply and identifies specific sites which are considered to meet the criteria set out in the National Planning Policy Framework (NPPF) (MHCLG, 2018) and contribute to the five years provision.
2. The policies in the NPPF apply from the date of its publication (para 212) in July 2018. Consequently, this statement has been prepared in accordance with the NPPF and the National Planning Policy Guidance (NPPG).
3. The National Planning Policy Framework (NPPF) sets out the Government’s housing objectives including a commitment to significantly boost the supply of housing.
4. Local Planning Authorities (LPAs) are required to identify and update annually a supply of specific deliverable sites sufficient to provide five years’ worth of housing against their housing requirements with an additional buffer of 5%, 10% or 20% depending on local circumstances.

NPPF para 73

‘Strategic policies should include a trajectory illustrating the expected rate of housing delivery over the plan period, and all plans should consider whether it is appropriate to set out the anticipated rate of development for specific sites. Local planning authorities should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years’ worth of housing against their housing requirement set out in adopted strategic policies, or against their local housing need where the strategic policies are more than five years old. The supply of specific deliverable sites should in addition include a buffer (moved forward from later in the plan period) of:

- a) 5% to ensure choice and competition in the market for land; or*
- b) 10% where the local planning authority wishes to demonstrate a five year supply of deliverable sites through an annual position statement or recently adopted plan, to account for any fluctuations in the market during that year; or*
- c) 20% where there has been significant under delivery of housing over the previous three years, to improve the prospect of achieving the planned supply’.*

5. For the purposes of the NPPF, deliverable sites are defined as follows:

Deliverable:

‘To be considered deliverable, sites for housing should be available now, offer a suitable location for development now, and be achievable with a realistic prospect that housing will be delivered on the site within five years. Sites that are not major development, and sites with detailed planning permission, should be considered deliverable until permission expires, unless there is clear evidence that homes will not be delivered within five years (e.g. they are no longer viable, there is no longer a demand for the type of units or sites have long term phasing plans). Sites with outline planning permission, permission in principle, allocated in the development plan or identified on a brownfield register should only be considered deliverable where there is clear evidence that housing completions will begin on site within five years.’

(NPPF page 66)

The Five-Year Period and Housing Requirement

6. This statement includes completions from the reporting year of 2017/18; planning approvals up to 31 March 2018; and projected completions for a five-year period from 1 April 2018 to 31 March 2023. In some instances, where a site with an Outline permission in 2017/18 received consent for Reserved Matters in 2018/19, the Reserved Matters reference number has been provided within the planning reference information.

Base-line housing requirement

7. Maldon District Council’s housing requirements are set out in the Approved Local Development Plan, including an up-to-date assessment of the District’s OAN. It has been identified that the District’s housing requirement for the next 15 years is 310 new homes per annum, or 4,650 over the plan period (2014-2029). The base-line 5 year requirement is therefore 1,550 dwellings (310 x 5 years).

Housing completions

8. Completions for the reporting year (in **Table 1**) have be calculated from the data provided in **Appendices A, B and C**. For monitoring purposes housing completions are recorded as complete where
- there are completions in the current year from permissions data which is either ‘Work Complete’ (e.g. five dwellings permitted, five dwellings built) or ‘Partial Completion’ (e.g. five dwellings permitted, 2 dwellings built);
 - the dwelling is built in accordance with the planning permission.
9. In addition previous years completion rates are set out in **Table 2**.

Table 1 Completed dwellings total for reporting year 2017/18

Category	Net Completions
Sites fully completed within the year (Appendix A)	104
Partial completion of sites with planning permission for 2-9 dwellings (Appendix B)	8
Partial completion of sites with planning permission for >10 dwellings (Appendix C)	54
Total	166

Table 2 Calculation of completions since the start of the LDP period 2014/15

Year	Net Recorded Completions	Annual Average Requirement	Shortfall/Surplus of the year
2014/15	69	310	-241
2015/16*	230	310	-80
2016/17	243	310	-67
2017/18	166	310	-144
Total	708	1,240	-532

*Following verification with Council Tax data, the figure for 2015/16 has been amended from previous publications.

10. There is a cumulative shortfall of 532 units since 2014/15, and this is added to the rolling five-year housing requirement.

NPPF Buffer

11. Under the NPPF (para 73 and footnote 39) the 5 year housing requirement should include one of the following buffers:
- 5% for choice and competition, **or**
 - 10% to demonstrate a 5YHLS through an Annual Position Statement or recently adopted Plan, **or**
 - 20% if housing delivery has fallen below 85% the housing requirement over the previous 3 years.
12. Under the NPPF, the Maldon District Local Development Plan remains a ‘recently adopted Local Plan’ until 31 October 2018 and, therefore, the five year land supply has been demonstrated through the LDP. Accordingly, the Council could apply a 10% buffer.
13. As the 2017/18 5YHLS falls within this period, a 10% buffer could be applied to demonstrate a 5YHLS. However, in November 2018, the Government will publish the results of the first Housing Delivery Test (HDT). Although the first HDT results have not yet been published, it is recognised that housing delivery in the District has fallen below the 85% HDT threshold. The Council also recognises that by the end of October 2018, the LDP ceases to be ‘recently adopted’ as defined in the NPPF and, therefore, the 10% buffer would not apply. Therefore, to

future proof the 2017/18 5YHLS a 20% buffer has been applied. Despite a 20% buffer, the Council maintains a 5 year housing land supply.

Calculating the rolling five year housing requirement

14. The rolling five year requirement in **Table 3** is based on the LDP annual requirement of 310 multiplied across 5 years, plus/minus completions from the start of the Plan period, plus a 20% NPPF buffer.

Table 3 Rolling five-year requirement

Base 5 year requirement (310 x 5)	1,550
Shortfall/Surplus	
LDP requirement in reporting year (since 2014)	1,240
Net provision delivered in LDP period to date (2014-29) (see table 2)	708
Over/under supply in reporting year	-532
Rolling five-year housing requirement	
Five year requirement	1,550
+/- Over/under supply in plan period	+532
Sub-total	2,082
+ 20% NPPF buffer	416
Total	2,498

The Supply of Deliverable Housing

15. The District's housing supply consists of the following components:

- LDP Strategic Allocations and other sites with extant planning permission
- Windfall allowance identified in the LDP
- LDP Strategic allocations with a resolution to grant permission subject to the completion of a S106 agreement, or without planning permission that are considered deliverable within five years

16. Only developable and deliverable sites (or part of a site) with a reasonable expectation that development will occur in the next five years are included in the five-year housing supply. To be considered developable, *'sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged'* (NPPF definition page 66).

17. The NPPF defines deliverable sites (NPPF page 66) as being:

- Available now
- Suitable location for development
- Achievable with a realistic prospect that housing will be delivered on the site within 5 years
- Sites with detailed planning permission for under 10 houses are deliverable until the permission expires
- Sites with outline permission or LDP allocations are deliverable if there is clear evidence that housing completions will begin on site within 5 years.'

18. Where it is known that a site will not be developed, that site is excluded from the housing supply for the 5YHLS calculation (see **Appendix F**).
19. Expired planning permissions are excluded from the housing supply (see **Appendix G**).
20. In Maldon District there has been a historically low level of permissions expiring before development commences (see table 8). In the Plan period (2014/15 to 2017/18) of the 45 permissions that expired, only 15% of these were outline permissions. Therefore, it is considered that all sites with outline planning permission are deliverable. Where the application of the housing delivery formula in **Table 4** indicates that a site with outline permission may not be delivered within the 5 year period, it is listed in the site schedule with a nil contribution to the 5YHLS. To take into account the low expiry rate (see paragraph 38), an allowance for expiry and slippage is applied to the 5YHLS calculation.

Phasing for sites with planning permission

21. The phasing estimate for a site will vary from year to year, depending on updated information, whether the site's status has progressed, and, if under construction, the housing completion rate being achieved on site. Naturally, the phasing for most of the Local Development Plan allocations has changed since the LDP was approved in July 2017. This is as a result of sites receiving planning permission, construction progress and site delivery information received from developers.
22. The Council has used the definition of 'deliverable' in the NPPF in its assessment. To estimate the phasing of site delivery for the 5YHLS, the following formulae have been used:

Table 4 Methodology for estimating housing delivery

Site status	Explanation	Code
Full planning permission	<ul style="list-style-type: none"> Full planning permission lasts for 3 years from the date of approval. For small sites under 10 houses, an additional one year build allowance has been added. <p>Example: Full planning permission granted 01-05-2017 Permission valid until 01-05-2020. Plus 1 year build allowance Delivery estimate = 2021/22</p>	Full+1yr
Outline permission	<ul style="list-style-type: none"> Outline permission is valid for 3 years. Reserved matters permission must be granted within 3 years of the outline permission being approved. Reserved matters permission is valid for 2 years from date of approval. For small sites, a 1 year build allowance has been added: <p>Example: Outline permission granted 01-05-2017 Reserved matters deadline 01-05-2020 Reserved matters valid until 01-05-2022 Plus 1 year build allowance Delivery estimate = 2023/24</p>	Out+3yrs
Change of Use Planning Application (COUPA)	<ul style="list-style-type: none"> Must be completed within 3 years of the date of approval <p>Example: COUPA granted 01-05-2017 Completion must be within 3 years of approval (ie by 01-05-2020) Delivery estimate = 2020/21</p>	COUPA
Site Work Started	<p>Where a site visit identifies that work has started on site, an allowance of 2 years is given for housing delivery</p> <p>Example Site Work Started on 01-05-2017 Plus 2 years Delivery estimate = 2019/20</p>	SWS+2yrs
Under construction	<p>For small sites under 10 units</p> <ul style="list-style-type: none"> Where a site visit identifies that the development is under construction, a 1 year build allowance is added <p>Example Under construction 01-05-2017 Plus 1 year build allowance Delivery estimate = 2018/19</p>	UC+1yr
Under construction	<p>For sites over 10 units</p> <ul style="list-style-type: none"> Where the development is under construction, a 2 year build allowance is added <p>Example Under construction 01-05-2017 Plus 2 year build allowance Delivery estimate = 2019/20</p>	UC+2yrs
Sites over 30 units	<ul style="list-style-type: none"> For sites over 30 units, either with planning permission or LDP allocations without planning permission, the relevant housing developer/agent has been approached to provide a housing delivery trajectory for the site. Where a developer/agent has provided a trajectory, or have submitted trajectories as part of planning applications, this is the phasing included in the 5YHLS 	Devr
Sites over 30 units	<ul style="list-style-type: none"> For sites over 30 units, where a developer's housing delivery trajectory is not available, MDC officers have estimated the trajectory based on local knowledge. 	Custom

23. For sites of 30 or more dwellings, where developers/agents have either provided projected delivery rates for their site or have submitted trajectories as part of planning applications, that is the delivery rate used in this report. Developers provided delivery trajectories for a number of sites in the District, ranging from 30 units to 600 units in size. The reported future housing completions rates vary from 7 to 126 units per year, depending on the individual phasing plan for individual sites. The average forecast delivery rates for each site (total capacity /number of construction years) range from 21 to 96 units per annum.

Sites with extant planning permission

24. In previous 5YHLS reports, sites were categorised as small, medium or large. In this 5YHLS report, sites are categorised either as small (under 10 units) or major (10 or more units) to better reflect how development size is categorised in the NPPF. The five year housing supply includes LDP allocations with planning permission, which are listed within the major sites schedule.

25. **Table 5** shows that permissions for a total of 2,117 units are in the development pipeline.

Table 5 Extant planning permissions (net)

Category	Net Outstanding
Small Sites 1 - 9 units (Appendix B)	275
Major Sites 10+ units (Appendix C)	1,842
Sub-Total	2,117

Strategic Allocations

26. The Local Development Plan Policy S2 contains a housing trajectory (LDP page 24) for the delivery of the Garden Suburbs and Strategic Sites; , [other] ‘*extant planning permissions;*’ ‘*windfall allowance;*’ and sites to be delivered through ‘*Neighbourhood Plans.*’ This was tested through the LDP Examination in January 2017 and found sound by the Inspector, ahead of the Plan’s approval by the Secretary of State. The delivery rates for some of the strategic allocations in this report (monitoring period 2017/18) have now changed, as permission has been granted on sites, construction has started, or developers have provided updated information on the planned phasing of a site’s construction. A 5YHLS housing trajectory table for the LDP allocations is provided at **Appendix E**.

27. The LDP allocations with planning permission are included in the major sites schedule at **Appendix C**.

28. The five year housing supply includes LDP allocations that have a resolution to grant planning permission subject to S106 or are yet to receive planning permission (**Appendix D**), that are expected to deliver housing within the five year period. A summary is provided in **Table 6**.

Table 6 LDP allocations with resolution to grant planning permission or without planning permission that are expected to deliver housing in the five year period

LDP allocations	No. units (net)
Resolution to grant planning permission	528
No planning permission	90
Sub-Total	618

29. Where an allocation is expected to deliver housing beyond the current five year period, it is included in the schedule, but with a nil contribution to the 5YHLS.

Windfall allowance

30. The LDP Windfall allowance in the LDP is 300 units for the plan period, equating to 23 units per annum from 2016/17 (Maldon District LDP, pg 24). This was the figure used in the 2016/17 5YHLS report. However, since 2007/08, on average, 75 dwellings have been granted permission on windfall sites each year. Since the start of the Plan period (2014/15), the average has increased to 140 units granted permission per year².

31. **Table 7** demonstrates that windfall has been a reliable source of housing supply³ for over a decade

Table 7 Capacity of windfall sites by year of consent

Year	Windfall sites permissions granted in the year (net no. units)
2007/08	52
2008/09	27
2009/10	24
2010/11	41
2011/12	17
2012/13	6
2013/14	101
2014/15	85
2015/16	103
2016/17	299
2017/18	75
Total	830
Average	75

32. Therefore, for the 5YHLS, the contribution of windfall sites to the housing supply is increased to 50 units per annum.

33. To ensure that completions on existing sites with planning permission are not double counted as windfall, the windfall allowance is only added for years 3-5 of the 5YHLS. Therefore a windfall figure of 150 units is added to the housing supply calculation.

² The larger than usual number of permissions on windfall sites in 2016/17 was due to two appeals being determined.

³ As required by NPPF 2018 paragraph 70

Sites not included in the 5YHLS

34. Where development is unlikely to come forward within the five year period on sites with planning permission, the site is discounted from the five year housing land supply, and is listed in **Appendix F**. These sites are either no longer available for development or have various long-term issues preventing development. If circumstances change, for example work recommences on site, or a new planning permission is granted, the site would be placed into the housing supply schedule.
35. If the formula used to estimate delivery (see **Table 4**) indicates that housing delivery will fall outside of the five year period, the site is included in the schedule, with a nil contribution to the 5YHLS. This is in recognition that such sites could come forward within the five year period.

Slippage and Non-Implementation rate

36. As shown in **Table 8**, over the last 10 years there has been an average expiry rate of 3.79% for planning permissions. Taking the four years of the Plan period (2014/15 to 2017/18), the average expiry rate is less than 1%. Planning permissions expiring in the monitoring year are listed in **Appendix G**.
37. The vast majority of major and strategic sites in the land supply are on greenfield land where schemes are generally less complicated. It is reasonable to assume that greenfield sites contributing towards the 5YHLS, will be delivered.

Table 8 Expiry rate of planning permissions (last 10 years)

Year	Net units of expired permissions	Capacity from all extant permissions	%
2008/09	25	298	8.39
2009/10	23	381	6.03
2010/11	21	380	5.52
2011/12	24	378	6.35
2012/13	11	297	3.70
2013/14	22	497	4.45
2014/15	6	1,040	0.58
2015/16	7	1,457	0.48
2016/17	31	1,565	1.98
2017/18	12	2,650	0.45
Total	182	Average Expiry Rate	3.79%

38. Changes to the housing delivery trajectory for individual sites are already accounted for in Appendices B, C and D and within the 5YHLS housing supply calculation itself. Therefore, to avoid double counting, the slippage and implementation rate focuses on permission expiry rates only.
39. To allow flexibility and to cater for possible changes in the housing market, a 4% slippage and non-implementation rate, based on past trends, has been applied to the total deliverable housing supply for the five-year period.

Calculating the supply of housing

40. **Table 9** demonstrates how the supply of housing is calculated.

Table 9 Total deliverable housing land supply 2017/18 – 2022/23

Source of Supply	Units
Sites with planning permission. <ul style="list-style-type: none"> • Appendix B small sites –275 dwellings • Appendix C large sites (including Strategic Allocations with planning permission) – 1,842 dwellings 	2,117
Appendix D - Other LDP strategic allocations identified in the LDP: <ul style="list-style-type: none"> • sites without planning permission – 90 dwellings • sites with a resolution to grant planning permission subject to completion of a S106 agreement - 528 	618
Windfall Allowance (for years 3-5)	150
<i>Sub-total</i>	<i>2,885</i>
Minus 4% slippage and non-implementation rate	115
Total supply	2,770

Calculating the five year housing land supply

41. Table 10 assesses the degree to which the District is maintaining a five-year supply of deliverable sites as required by the NPPF. The table presents the total number of net additional dwellings that are deliverable as a percentage of the planned housing provision for the five-year period. The formula and calculations are contained within the table below:

Table 10 Assessment of five-year supply against average annual target

Five Year Supply	Units / Years
Total supply (from Table 9)	2,770
Rolling five-year housing requirement (from Table 3)	2,498
Housing Supply in years	$(2,770 / 2,498 \times 5)$ = 5.54 years

42. As shown above, the Council can demonstrate an adequate five year supply of deliverable housing land to meet its objectively assessed needs with a 20% NPPF buffer and a 4% slippage and non-implementation rate included.

Conclusion

43. This statement provides evidence that the Council is able to demonstrate a supply of specific deliverable sites sufficient to provide for 5.54 years' worth of housing against the Council's identified housing requirements.

44. The Council will continue to monitor the District's housing supply on a regular basis. This statement will be updated to take account of any significant changes, including new planning permissions granted and dwellings completed.

						350	13	337	25	36	278			8	120	43	35	48	29	275

Note:

1. See table 4 for explanation of the codes used
2. Completions figures as at 31 March 2018;
3. Where developments replace more than one dwelling (ie two for two replacement), and the development is part completed affect the totals. The column totals, when summed together, are lower than the net outstanding total: Gross outstanding minus actual+potential losses = 276, as compared to the net outstanding total of 278.
4. All tables include applications relating to the loss of dwellings through demolition or change of use.

Appendix C - Large Sites with planning permission (10 or more dwellings)
