Gary,

Further to this morning's telephone conversation, please find attached plan outlining what I believe should be the correct boundaries for the employment allocation at Langford.

As the owner of the land I can confirm that not only was the map incorrect within the 1995 Local Plan but has also been extended to be even more incorrect.

The 4.2 acre site outlined in black shows the area that should be allocated and all the pink shading outside should be deleted, as not only is factually incorrect and never intended to be part of the employment allocation, it is all within the conservation area and covered with trees.

Regards,

Ian.
