**For the attention of David Coleman**

Dear David

**Maldon District Local Development Plan consultation**

Thank you for consulting us on your draft Local Plan

We welcome your proposals to reduce traffic and promote public transport and note that you intend to work with a range of partners to deliver a more sustainable transport network.

The location of development has the greatest influence upon car traffic generation and we note that you have obviously given this a lot of thought in your proposed allocations and we agree that these are appropriate. It is however, also important that services, jobs and infrastructure come forward at an appropriate time so that they are there when the demand first arises.

The Highways Agency do not have any other comments to make on the content of the document and we will continue to work with you on the transport evidence base and trying to establish more sustainable transport patterns within the district.

Yours faithfully

Mark Norman
