To Chief Planning Offices

As a long standing resident in this village I strongly object to this Development plan. We do not want any more houses in this village as there are too many already. The sewerage system that is here cannot cope with the amount of houses that are already here, and the drainage is not able to cope with surface water either. More houses on flood zone land would only increase the flooding of property's already here.

There is only one road in and out of the village which turns into a very fast and dangerous road. Vision on the junction is hampered by tall hedges and there are many accidents some are fatal.

Hospitals are very awkward to get to, unless you drive a car, to get to Broomfield its train to Shenfield change for Chelmsford the a bus, or three changes on a demand bus service or TAXI.

People who are working outside the village have to travel by train, which is packed like sardines when it gets to Nth Farnbridge there is no employment in the village,

urgencies in this area are (3259)
bed. are 5 to 10 miles away again
bridge.

ent plan of 75 houses would
the Essex wildlife Trust reserve
loss of habitat for the wildlife
re flooding.

arks or footpaths or cycle paths in

area are full and cannot take any
so they are several miles away
pl.

some of the reasons why I very
CT to this local Development
75 houses even 5 would be to many.

Yours faithfully
