Q13 The Council has produced an updated to support the Draft LDP which is available on the Council's website. Do you have any comments on this?

This document is riddled with jargon and should be far more concise - but it is merely an exercise in ticking a box that will have little real impact on key decisions. I hate to think what this nonsense has cost and what it's impact will be on any real decision making. A far more common sense approach is required and I'd send it back to the authors with a request to reduce the report to 10 pages.

Q14 Do you wish to comment on the *proposals map* or any other policies in the Draft LDP?

A deliberate attempt to disenfranchise residents who are unlikely to devote the necessary time to study the draft LDP! No consideration has been given to the impact upon the transport infrastructure or health, education and social needs. Additional supermarkets are not required and cannot be regarded as sustainable development or contributing to a "local economy". Deaths on Maldons Roads are a real concern that appears to be disregarded. The availability to receive medical assistance...

Q15 If you wish to make any other comments on the Draft LDP, enter your comments in the box below

.....the availability of emergency medical assistance is reliant upon an air ambulance that is supported by charity. It is foolhardy to place further lives at risk by overdevelopment of rural communities, overloading roads and overwhelming local schools and medical facilities. Identifying areas for development in the isolated manner chosen with three main locations is an oversimplification of the likely market requirements for development land. A policy steered towards sustainable development within existing villages/towns would allow smaller less intrusive development. By identifying large areas for housing in limited locations it is likely that any development would be by a "National" house builder with identikit housing out of keeping with the area. Employment opportunities in areas like Burnham on Crouch are at best weak and many residents commute into London to gain employment. The transport infrastructure (trains and roads) is already second or third rate.
