Q13 The Council has produced an updated to support the Draft LDP which is available on the Council's website. Do you have any comments on this?

We appreciate the need for housing in the area but main concern are that unlike Maldon & Heybridge, Burnham has only one road in & out. Traffic levels are already quite high, parking limited & difficult at weekends & in summer months. Proposed number of houses could cause congestion which will affect the quality & character of a rural town We understand there are no plans to enlarge schools/medical centre/supermarkets/upgrade sewage system

Q14 Do you wish to comment on the *proposals map* or any other policies in the Draft LDP?

Development of 90 homes in Marsh Rd 3 estates Lees/Glendale/Glebe have to use Marsh Rd for access - approx 300+homes Traffic levels are quite high with large farm vehicles - particularly during planting(harvesting - large/very large lorries deliver daily to businesses on marshes/abattoir lorries Also the primary school creates heavy traffic & difficult parking at drop off/pick up times Pavement one side only - parking also Concern that narrow rd to marshes will become busy & quite dangerous rd

Q15 If you wish to make any other comments on the Draft LDP, enter your comments in the box below

First of all we want to stress that these responses are not just (not in my backyard) comments. We do appreciate the Council's position & need for new homes in the area. We were advised that there would be no access into Green Lane from the proposed development off Southminster Rd. but it is quite likely that this lane could be used to leave town from that development which could turn a quiet country lane into a through rd. We also understand that as a result of these proposals the Highways Dept are looking at redeveloping the T junction out of town & replacing with a roundabout. which could mean taking down the big old tree. a character landmark into Burnham By reducing the number of proposed properties to be built, particularly on the north side of town, it may take away the need for changes to the T junction
