

Permitting decision note: Application

Permitting decision: Permit Granted

This decision relates to a Part B permit application from Maldon Fields Limited (Company registration number: 13690152) for an activity involving the cremation of human remains at the following address:

Maldon Fields Crematorium
Maldon Road
Woodham Mortimer
Maldon
Essex
CM9 6SN

The permit number is MLD/EPR/B/009. The date of this decision is **15th October 2024**.

Purpose of this document

This decision document provides a record of the decision-making process. It summarises the decision-making process to show how the main relevant factors have been taken into account.

Decision considerations

Confidential information

The application does not contain any commercially confidential information.

Key issues of the decision

The plant and the way it will be operated meets the Best Available Techniques detailed in PG5/2(12) September 2012 Statutory guidance for Crematoria.

The permit also includes the requirement to control and limit emissions of Nitrogen Oxides as detailed in the permit application. The emission limit and monitoring requirements for nitrogen oxides from draft environmental permitting technical guidance PG5/2(23) have been applied. Although an emission limit value for ammonia isn't specified in current or draft guidance, the requirement to make an annual measurement for ammonia is and has also been included in this permit because 'ammonia slip' can occur when selective non-catalytic reduction is used to control emissions of Nitrogen Oxides. All other emission limits remain as PG5/2(12) September 2012.

A permit comprising 60 operating conditions has been **granted**.
